The Paradox Twin

The Paradox Twin was formed by singer, songwriter, guitarist, keyboard player,

Danny Sorrell who, following the writing of the band's debut album

'The Importance of Mr. Bedlam', walked into **Outhouse Studio**, the well known recording studio run by producer and musician extraordinaire **John Mitchell**,

for the recording.

John was so impressed with what he heard that he suggested to **Chris Hillman**, John's partner in the **White Star Records** label, that they should release the album. Chris was as impressed as John was and so the band were signed to the label. The album was very well received with the video of the first single from the album, '**Planeta**', gaining a nomination at the prestigious **Progressive Music Awards** even before the album had been released. The band went on to receive another nomination the following year in the **best new artist's** category. The album has gained the band a worldwide reputation and following with glowing reviews and radio plays.

The band since has released its much anticipated follow up album **Silence from Signals**, which, just like their debut, has received outstanding reviews, and one not to be missed!

The **forthcoming new album** is now being recorded and more info about it will come soon...
